

Department of Anatomy and Neuroscience Vacation Scholarship

Undergraduate Science and Biomedical Science students have the opportunity to undertake 4-6 weeks work full time on a project within the Department of Anatomy and Neuroscience. Up to four vacation scholarships are offered each year and they are worth \$1000 each. The work performed is not for credit but a report of the work is required at the end of the scholarship period. The scholarship covers research projects conducted within laboratories of the Department of Anatomy and Neuroscience. Selection for the scholarship is based on academic merit.

The scholarships can be held for 4-6 weeks by arrangement with your supervisor. In the Vacation Scholarship, the student will work in their supervisor's laboratory on the design, execution and analysis of a series of experiments. It is important that a student first obtain the agreement of a supervisor before completing this form.

The scholarship is tax free and will be paid as lump sum midway through your tenure. The applications will be considered during the last week of Semester 1 and Semester 2 and successful candidates will be advised as soon as possible thereafter. The work would normally be done over the mid year or summer vacation. Further details of research groups within the Department can be found under the Research tab on the Department web site.

Please complete the following application and return it to:

Associate Professor Robb de Iongh
Department of Anatomy and Neuroscience, Rm E 238, Level 2, Medical Building
