

THE UNIVERSITY OF  
MELBOURNE

# HONOURS IN PATHOLOGY

“My experience with research started with doing a third year project and my supervisors were approachable and supportive. I was given guidance as well as opportunities to contribute ideas to my project. As I developed a greater interest for research, I completed a PhD exploring neurodegenerative brain disease.”

Xin Choo  
Previous Honours in Pathology & PhD student

Pathology is the scientific study of the nature of disease.

Honours in Pathology provides an introduction to the challenging area of investigation of disease processes at the cellular and molecular level.

Students undertaking Honours in Pathology will be members of the Department of Microbiology & Immunology and will undertake a full-time research project based in a laboratory on campus, or at one of our affiliated research institutions.

**Information Session via Zoom**  
**Friday, September 11, 4pm - 5pm**  
Requires registration

Hear from the course coordinator who will outline the entry requirements, an overview of the types of projects, the course structure and further study and career opportunities.
